Press release

Applicate Ltd selected to attend ILA Startup Day 2016

Berlin, 30 May, 2016

As part of ILA Berlin Airshow's first ever Startup Day, Applicate Ltd will present their airports database app to buyers, investors and interested parties.

Applicate Ltd will be presenting Airports for iOS and Android in the Startup Area of ISC Hall 6 between 13:30 and 16:30 on 2 June 2016. Visitors will be able to test the app on one of our devices and there will be an opportunity to answer questions.

Airports is a airports database app for pilots that helps enhance situational awareness both before and during flights. The database not only features weather, Notam and runway information, it also supplies pilots with a useful tools kit that features items such as a Snowtam decoder and a fuel uplift calculator.

Presenting the company at the Startup Day will be director and administrator Annelies Morlion. Annelies helped form Applicate Ltd in 2012. She has 13 years of commercial flying experience and has been running Applicate Ltd since 2014.

Applicate Ltd wants to further improve the quality of the Airports app data and is attending ILA Startup Day looking for ways to do this.
